News Release: Visible® launches on-line certification program for software engineers.

BOSTON, MA – January 1st, 2013 – Visible launches the first of its kind on-line certification program for software engineers. The certification program is a comprehensive, self-paced, online system that covers all the Knowledge Areas in the Software Engineering Body of Knowledge (SWEBOK) as referenced in the ISO/IEC 24773:2008(E) International Standard. The system is delivered in a web-based, H.264 compatible format and can be viewed using Adobe Flash from all browsers. The videos are organized into 8 segments that represent the Standard Areas of Knowledge. These 8 segments would be of interest to software professionals whom desire to obtain their International Certification in Software Engineering. There are a total of 125 hours of video instruction.

“We see an increasing number of employers seek software development professionals who have obtained their certification. In this very competitive and global economy, having obtained certification status is not only a competitive advantage, it is quickly becoming a requirement.” said Michael Cesino, President and CEO. “In an international environment where software is highly relevant to all facets of daily commerce, the need for qualified, skilled and competent, software professionals is greater than ever. To meet this need, we are offering an international certification for software engineers.” added Cesino.

To learn more about the Visible Systems eLearning videos, contact us at eLearning@visible.com.

BENEFITS:

The benefits are shared across:

- **Employers who need to maintain a level of competency** by standardizing software development practices and protect their investment in a competent and proficient workforce.
- **Professionals working as software engineers** to confirm their proficiency of established software development practices and demonstrate their commitment to professionalism.
- **Graduates of software engineering curriculum:** Bridges the gap between your education and work requirements and verifies your understanding of fundamental software development practices.

If interested, please contact Sales at elearning@visible.com or Michael Cesino directly at mcesino@visible.com.
